LABORATORY REPORT

COMPREHENSIVE METABOLIC PANEL • LIPID PANEL • HBA1C

Ordering: Aurora Internal Medicine Group
Physician: Dr. Alan Whitfield, MD (Internal Medicine)
Collected By: R. Okoye, CPT (Venous Draw)

Report No: LAB-2026-071042
Collection Date: 2026-07-06 07:45 AM
Report Date: 2026-07-07 01:30 PM

PATIENT INFORMATION

Name:	Date of Birth:	Age / Gender:
Margaret Chen	March 14, 1968	58 / Female
MRN:	Patient ID:	Address:
MRN-0001042	PT-031468	418 Cedar Lane, Aurora, CO 80014
Primary Care Provider:	Fasting Status:	Active Conditions:
Dr. Alan Whitfield, MD	Fasting (12 hrs)	T2DM (E11.9), HTN (I10)

TEST NAME	RESULT	UNIT	REFERENCE RANGE	STATUS
GLYCEMIC MARKERS				
Hemoglobin A1c ICD-10: E11.9 Above target; care-plan goal is A1c < 6.5%. Method: HPLC (NGSP certified).	7.4	%	4.0 - 5.6	HIGH
Glucose, Fasting ICD-10: R73.09 Method: Enzymatic hexokinase (Roche Cobas analyzer).	138	mg/dL	70 - 100	HIGH
LIPID PANEL				
LDL Cholesterol ICD-10: E78.5 Elevated; care-plan goal is LDL < 100 mg/dL. Atorvastatin 20 mg initiated.	142	mg/dL	< 100	HIGH

TEST NAME	RESULT	UNIT	REFERENCE RANGE	STATUS
HDL Cholesterol ICD-10: E78.5	48	mg/dL	> 40	NORMAL
Triglycerides ICD-10: E78.1 Method: Enzymatic colorimetric (GPO-PAP).	176	mg/dL	< 150	HIGH
Total Cholesterol ICD-10: E78.0 Calculated from measured fractions.	205	mg/dL	< 200	HIGH
COMPREHENSIVE METABOLIC PANEL				
Sodium (Na) ICD-10: E87.8 Method: ISE (Siemens Dimension analyzer).	140	mmol/L	136 – 145	NORMAL
Potassium (K) ICD-10: E87.6 Method: ISE with hemolysis detection.	4.4	mmol/L	3.5 – 5.1	NORMAL
Chloride (Cl) ICD-10: E87.8	103	mmol/L	98 – 107	NORMAL
Carbon Dioxide (CO2) ICD-10: E87.2	26	mmol/L	22 – 29	NORMAL
Blood Urea Nitrogen (BUN) ICD-10: R94.4 Method: Enzymatic UV (urease).	16	mg/dL	7 – 20	NORMAL
Creatinine ICD-10: R94.4 Method: Kinetic colorimetric (Jaffe).	0.9	mg/dL	0.6 – 1.2	NORMAL
eGFR ICD-10: N18.9 CKD-EPI 2021; no evidence of renal impairment.	88	mL/min	> 60	NORMAL
Calcium (Ca) ICD-10: E83.5 Method: Arsenazo III colorimetric.	9.4	mg/dL	8.6 – 10.3	NORMAL
Total Protein ICD-10: R77.0	7.1	g/dL	6.0 – 8.3	NORMAL

TEST NAME	RESULT	UNIT	REFERENCE RANGE	STATUS
Albumin ICD-10: R77.0 Method: Bromocresol green (BCG) dye-binding.	4.2	g/dL	3.5 – 5.5	NORMAL
Alanine Aminotransferase (ALT) ICD-10: R74.0 Liver function within normal limits.	26	U/L	7 – 56	NORMAL
Aspartate Aminotransferase (AST) ICD-10: R74.0 Method: IFCC reference method (no PLP).	23	U/L	10 – 40	NORMAL

Clinical Interpretation

Results are consistent with sub-optimally controlled type 2 diabetes mellitus. Hemoglobin A1c (7.4%) and fasting glucose (138 mg/dL) remain above the care-plan target of A1c < 6.5%. The lipid profile shows an elevated LDL (142 mg/dL) and triglycerides (176 mg/dL); statin therapy (Atorvastatin 20 mg) has been initiated per the current care plan. Renal function (eGFR 88, creatinine 0.9) and hepatic markers are within normal limits. Electrolytes and metabolic indices are unremarkable. Recommend continued lifestyle counseling, home glucose monitoring, and repeat metabolic and lipid panels in 8–12 weeks.

Additional Information

All testing performed in compliance with CLIA and CAP accreditation standards. Reference ranges are method- and instrument-specific and may differ from other laboratories. Instruments undergo routine maintenance, calibration, and daily quality-control verification to ensure result accuracy and reliability. This report was generated by the Meridian Diagnostics Laboratory Information System.
